

Project Demo Planning

Date	03-07-2026
Team ID	SWTID-2026-3845
Project Name	SMART LENDER
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Brief overview of the loan approval problem and objective of Smart Lender	3	Project Lead
2	Dataset & Preprocessing	Walkthrough of the dataset, handling missing values, and feature encoding	4	Data Scientist
3	Model Building & Comparison	Explanation of Decision Tree, Random Forest, KNN, and XGBoost model training	5	ML Engineer
4	Model Evaluation & Selection	Presentation of accuracy/precision/recall results and why XGBoost was chosen	3	ML Engineer
5	Web Application Walkthrough	Live demo of the Flask app: entering applicant details and viewing predictions	5	Frontend/Backend Developer
6	High-Risk Detection Scenario	Demonstration of flagging a high-risk applicant (irregular income, no credit history)	3	Backend Developer

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the challenge of manual loan approval and how Smart Lender automates creditworthiness prediction
2	Solution Overview	Highlight use of ML classifiers (Decision Tree, Random Forest, KNN, XGBoost) and Flask-based deployment
3	Live Feature Demonstration	Show applicant form submission, real-time prediction output, and high-risk applicant flagging
4	Q&A Session	Address evaluator questions on model accuracy, architecture, and future scope (batch evaluation, Render deployment)
