

Project Initialization and Planning Phase

Date	24-06-2026
Team ID	SWTID-2026-3845
Project Name	Smart Lender
Maximum Marks	3 Marks

Problem Statements:

Traditional loan approval processes rely heavily on manual evaluation of applicant documents and financial history. This approach is time-consuming, prone to inconsistencies, and becomes increasingly inefficient when handling a large number of applications. Manual assessments may also introduce subjective bias, leading to delayed approvals for eligible applicants or approval of high-risk borrowers, ultimately increasing non-performing assets (NPAs) and operational costs.

Example:

PS	I am	I'm trying to	But	Because	Which makes me feel
PS-1	Salaried applicant, good credit	Get quick loan approval	Manual review delays approval	Banks can't instantly identify low-risk applicants	Confident, optimistic
PS-2	Self-employed applicant	Get a fair loan evaluation	No credit history	Income is irregular	Anxious, uncertain
PS-3	Financial analyst	Process applications quickly	Manual review is slow	Many applications require evaluation	Overwhelmed
